

## Fluoro GE 150T

PTFE Micropowder

Fluoro GE designates a series of sub-micron PTFE powders made from emulsion grade virgin PTFE. This series covers a range of molecular weights which determine dispersability, thickening and performance properties. Due to the small particle size, the GE products have a larger specific surface area when compared to other PTFE micropowders.

### Product Description:

Fluoro GE 150T is a low molecular weight polytetrafluoroethylene (PTFE) micropowder.

### Applications:

Fluoro GE 150T is used for applications in industries such as aerospace, aviation, Mil-spec, petroleum, automotive, and other industries where high performance lubricants are required. This product can be used in conjunction with silicone oil, mineral oil, PAO, and other industrial oils.

### Features and Benefits:

-  Excellent Thickener
-  Improves Anti-Wear Properties

### Typical Properties:

 Appearance:	White Odorless Powder
 Particle Size Mean Value:	< 1 $\mu$ m
 Cone Penetration:	250 – 290 1/10mm
 Bulk Density:	200 – 400 g/l
 DSC Melting Point:	326 °C

### Regulatory Status:

The components of this product are listed on multiple chemical inventories. For specific information on the applicable chemical inventories, please refer to the product SDS. This product meets the requirements of 21 CFR 175.105, 175.300, 176.170, 176.180.

### Safety, Shipping and Handling:
